SENIOR PHP SYMFONY DEVELOPER (W/M/D) EHEALTH

POLAVIS successfully develops and implements digital solutions for hospitals. We are a leader in the market for patient portals and win our customers with our sophisticated portal solutions and extensive experience in clinical software projects. Our common goal is to connect all stakeholders in the healthcare system and involve patients in this process.

Your tasks

Exciting challenges await you every day in an international team, from design to implementation. Together with you, we are changing the healthcare sector and shaping the hospital of the future. You will work on products that advance society and preserve our health.

+ You will further develop the POLAVIS platform to change the healthcare system

+ You will work closely with Product Management

Your qualifications

+ You have at least four years of experience in designing and implementing web-based applications

+ You have more than 5 years of experience in PHP **AND** Symfony

+ You are familiar with Doctrine (MySQL or MariaDB), Twig and JavaScript (jQuery)

+ You are confident with Linux shell

+ You can communicate fluently in written and spoken English in an international team. Knowledge of German is a plus.

Desirable, but not a requirement

+ Experience in server administration (Apache, MariaDB)/DevOps

+ Experience in server virtualisation (VMware ESXi/Hyper-V)

Our offer for you

A meaningful role with plenty of room for development in a growing team. Flexible working time models, home office solutions and 30 days of annual leave. An attractive salary package, including performance bonus and individual training opportunities. An office in Berlin Mitte, Urban Sports Club, coffee, fruit, snacks and drinks as well as a very open and interdisciplinary team.

Please send us your application stating your salary expectations and desired start date to andrea.calciano@polavis.de (Head of Software Engineering)
